Dear Sirs. I am interested in your job offer. I am a graduate of the Poznań University of Technology in Automation and Robotics and currently i work as a "programmer and robotics specialist" at Technika Spawalnicza.

My adventure with programming began in high school, where I attended a class with an IT profile. Then, after graduating, I began my studies in Automation and Robotics at the Faculty of Computer Science at the Poznań University of Technology. During my studies, I worked at "Mały Inżynier", where I taught programming and robotics for children. After graduating and obtaining a Master of Science in Engineering, I started working at Pebos IT as an IT technician. In this job, I was programming AVR microcontrollers, developing sales application (in PHP) and do IT helpdesk. The next stage of my professional career is the company "Technika spawalnicza" where I currently work. During the first years of my work I was mainly involved in robotics - programming robots, conducting programming training, robots service, developing application for offline programming of robots by creating scripts (C++). After some time in the company, there was a need to implement a CRM application which I designed and implemented. I wrote the back-end using Laravel and PHP and MYSQL and the front-end using Bootstrap and JavaScript. I also added integration with the Leaflet Open Street Maps api and the NBP api. The application also includes preparation of price offer files in PDF. Outside of work, I try to expand my knowledge of programming by participating in courses and learning at home (Symfony, React)

I am interested in working both full-time and part-time (additional work). I can start working full-time 3 months after the decision to hire me (I am subject to a 3-month notice period with my current employer with the option of potentially shortening it). I can start working part-time (additional work) immediately. I would be grateful for the opportunity to present my candidacy during a direct interview.

Best regards

Karol Jędrzejak
